The final assessment in EC best practices, places Alila Seminyak at the forefront of ecological tourism developments.

14-05-2014 | By James Chen

BALI- The soon to open Alila Seminyak has surpassed Earthcheck Global standards in Building, Planning and Design Certification, scoring well above industry scores. The final assessment in EC best practices, places Alila Seminyak at the forefront of ecological tourism developments.

Alila Seminyak will be the first resort in Indonesia to surpass the rigorous EarthCheck Building, Planning and Design standards, achieving a 44 point best practice score against the industry norm at 5 points. This means that Alila Seminyak (particularly in Australasia and Indonesia) is a leading development regarding sustainable development and long-term ecological improvement performance.

Due to open at the end of 2014, Alila Seminyak will feature 240 rooms in a lush tropical setting combining the cosmopolitan buzz of popular Seminyak.
